SUMMARY

FullStack with practical experience engineering responsive web and mobile applications. Proficient across the software development lifecycle, combining frontend experience in React, Next.js, React Native, and TypeScript with backend systems powered by Node.js, Express, and databases. Eager to grow in software development and expand my full-stack skills.

EDUCATION

PHAROS UNIVERSITY | 2020–2025 GPA: **3.511**
Bachelor of Science in Computer Engineering

INTERNATIONAL LIBERTY SCHOOL | 2014–2020 GPA: **3.99**
American Diploma

EXPERIENCE

Amreya Petroleum Refining Co. | Jul. 2024

- Gained foundational knowledge of HTTP/HTTPS protocols and secure data transmission.
- Learned about common cybersecurity threats and web application vulnerabilities.
- Attended a database workshop covering fundamental database concepts and data management.

PROJECTS

GlucoCare - *React Native, Figma, Node.js, Express, MongoDB*

- Built the mobile app's frontend with a team as our graduation project with React Native and Expo.
- Created the complete UI/UX design in Figma.

Cartify – Next.js, Tailwind CSS, shadcn/ui, Figma ~ **repo link**

- Developed a full-featured e-commerce platform with Next.js, implementing SSR, dynamic routing, product catalogs, shopping cart functionality, and state management.
- Designed the UI in Figma and built a responsive, scalable interface using shadcn/ui and Tailwind CSS, integrating APIs and optimizing performance with lazy loading.

Connectly – React.js, Tailwind CSS, DaisyUI, Zod,Tanstack Query ~ **repo link**

- Developed a responsive social media platform using React.js and Tailwind CSS, with Context API for authentication and global state management.
- Integrated RESTful APIs and real-time data synchronization, building scalable UI components with DaisyUI and data validation with Zod.

Retail Store Management API-Node.js, Express.js, and MySQL ~ **repo link**

- Developed a RESTful API for retail store management using Node.js, Express.js, and MySQL, implementing CRUD operations for products, suppliers, and sales.

Saraha App-Node.js, Express.js, MongoDB, Mongoose, JWT, Google OAuth 2.0 ~ **repo link**

- Developed RESTful APIs for user authentication and application functionality.
- Implemented JWT-based authentication, Bearer Token authorization, password hashing, and email verification with integrating Google OAuth 2.0 for secure Google sign-in.
- Implemented data validation, middleware, and secure environment variable management.
